

Land Transport New Zealand Network statistics

for the year ending 30 June 2008

This publication records physical statistics, works completed, expenditure details and roughness data on local roads and state highways.

Land Transport NZ
Ikiiki Whenua Aotearoa

New Zealand Government

In July 2008 the amended Land Transport Management Act 2003 was enacted by Parliament. This legislative change follows the release of the Next steps review of the land transport sector, and confirms the government's commitment to strengthen the way in which land transport planning and funding is undertaken. One of the key changes is the merger of Land Transport NZ and Transit NZ into a new Crown entity, the NZ Transport Agency, focused on delivering the government's long-term vision for transport.

This publication covers the last full year of operation for Land Transport NZ from 1 July 2007 to 30 June 2008.

It records physical statistics, works completed, expenditure details and roughness data on local roads and state highways of the National Land Transport Programme. This information supplements *Land Transport New Zealand annual report for the year ending 30 June 2008*. All expenditure in this document is GST exclusive. Transit NZ expenditure is not offset by a third party or property sales revenue.

* All figures include professional services allocation

* Data may not add to stated totals due to rounding

¹ Administration is nominal 2.5% of Land Transport NZ contribution for individual authority

² Activity class as defined in the *Planning, Programming and Funding Manual* (2008). This manual uses the same Work Categories (WCs) as the *Programme and Funding Manual* 2006 although the Activity Classes are defined differently.

Glossary

NZ Transport Agency

On 1 August 2008, Land Transport NZ and Transit NZ became the NZ Transport Agency (NZTA). The NZTA brings together the functions and expertise of Land Transport NZ and Transit to provide an integrated approach to transport planning, funding and delivery.

NAASRA

Road roughness is measured by a system developed by the former National Association of Australian State Roading Authorities (NAASRA). Values are obtained by a special-purpose vehicle travelling down both outside lanes of the length of a road. The rougher the road, the higher the NAASRA counts per lane km. A NAASRA count over 150 typically indicates a road that's becoming a concern in terms of its roughness and the number of complaints likely to be generated.

Bridge

A structure designed to carry a road or path over an obstacle by spanning it. This includes culverts with a cross-sectional area greater than or equal to 3.4 m².

Speed-restricted bridge

A bridge with a posted speed restriction.

Timber bridge

A bridge where one or more structural elements are constructed of timber. Note: Decks are not considered.

Weight restricted bridge

A bridge with the maximum allowable load posted.

m

metre

km

Kilometre (= 1000 m).

Lane km

Length of a portion of the carriageway allotted for the use of a single line of vehicles.

Local road

A public road administered by a territorial authority.

State highway

A road that is declared to be a state highway under section 11 of the National Roads Act 1953 or by authority under the Transit New Zealand Act 1989. State highways are administered by the NZ Transport Agency (formerly Transit).

Total length of roading

Includes only actively maintained legal roads and streets.

Abbreviations used in tables

ARTA Auckland Regional Transport Authority

R (rural road). An area with a permanent speed limit greater than 70 km/h.

SPR (special purpose road). A local road that was historically accepted as a special purpose road in terms of section 104 (now repealed) of the Transit New Zealand Act 1989.

U (urban road). An area with a permanent speed limit of less than or equal to 70 km/h

N (road network). Note: Excluding special purpose roads.

TC (total cost). The sum of NZTA (formerly Land Transport NZ) and approved organisation expenditure.
